

Installation Manual

HOFA Curtain Rod Set Standard

Ceiling Mount with Ceiling Brackets

Accessory Parts:

Rod		One rod is included in one mounting system
Base Plate		Two base plates per system
Ceiling Bracket		Two ceiling brackets per base plate
End Cap		Two end caps are included in one system
Screw		One screw per ceiling bracket
Dowel		One dowel per wall bracket

General Information:

We recommend that two people carry out the installation. Secure fastening and the correct choice of screws and wall plugs always depend on the condition of the wall or ceiling and can only be correctly assessed on site. If in doubt, please consult a tradesperson.

For trouble-free installation, the surface should be as even as possible. Woodchip wallpaper is normally not a problem. On very uneven surfaces, such as natural stone, for example, installation is very difficult or even impossible. On slightly uneven surfaces, e.g. in old houses, the installation of non-split rails is usually also possible.

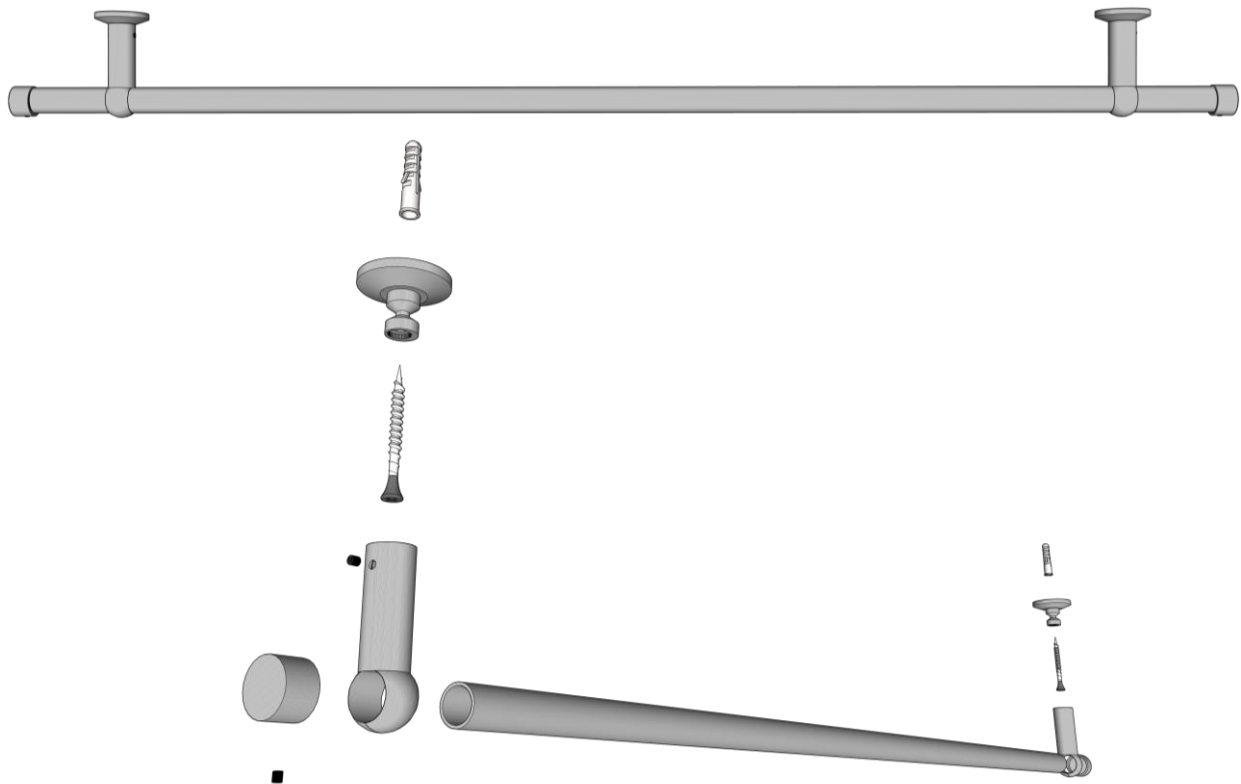

If you have any questions during the installation of the system, please do not hesitate to contact us by phone or e-mail: <https://hofa-akustik.de/en/kontakt/>

Tools and Equipment Required:

- Drilling machine with drill bit
- Cordless screwdriver with cross bit
- Allen key 1,5 mm and 2 mm
- Spirit level
- Pen
- Depending on the surface (additionally): mounting adhesive for gluing in the dowels

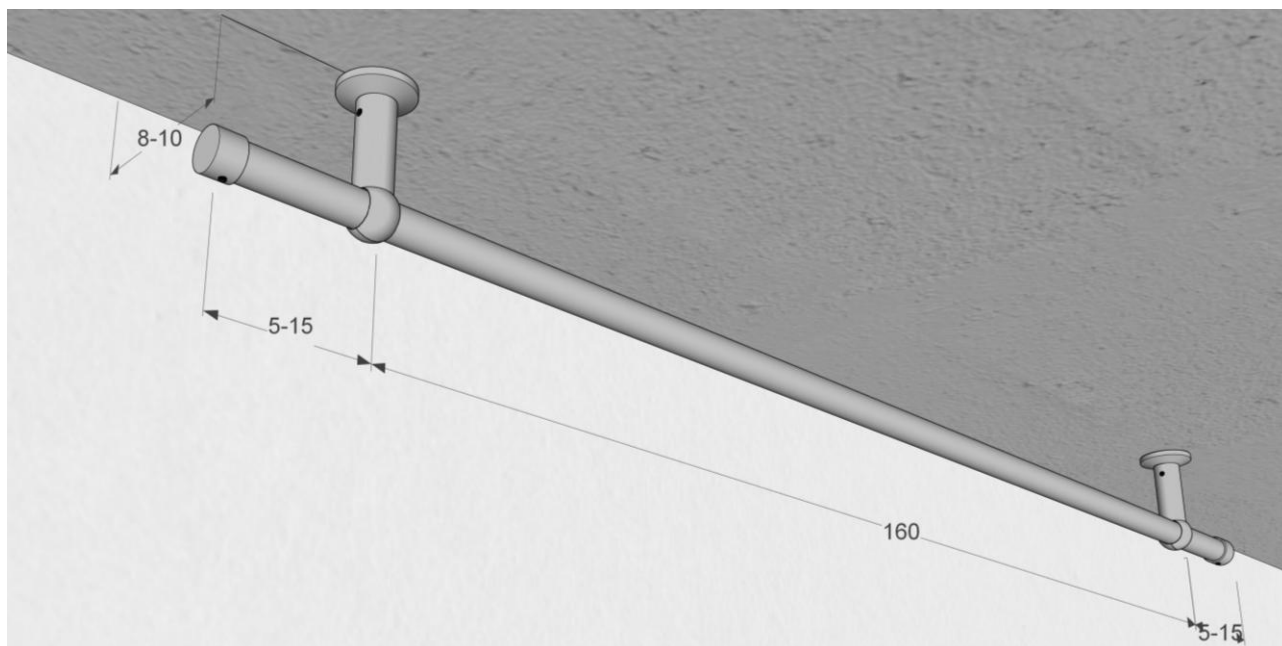

Overview:

Positioning of the Holders

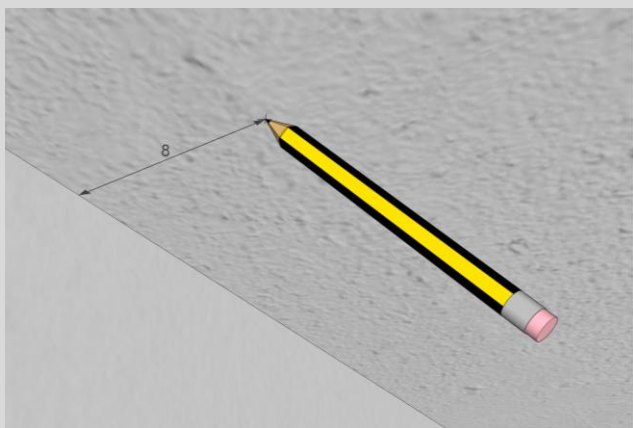

If the system is used in front of a wall or a window, the bar should be installed at a distance of approx. 8 cm.

Example for 190 cm rod length and a wall behind the rod

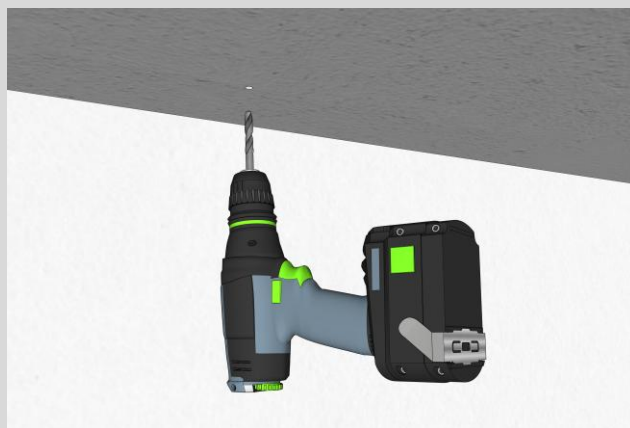

Mounting Steps for Installation

Step 1

Mark a drill hole for each bracket at the required bracket spacing. Mind the wall distance.

Step 2

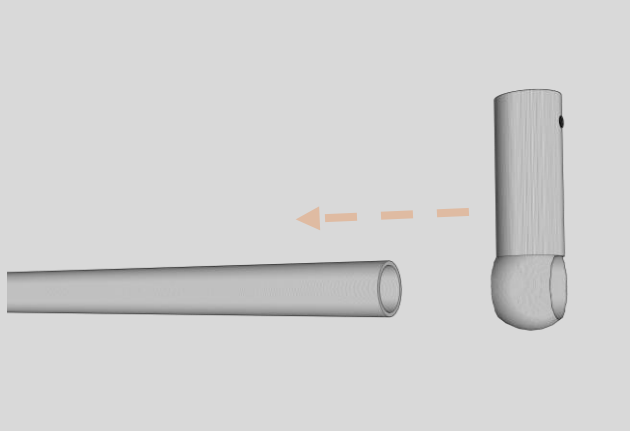

Drill holes and insert dowels..

Step 3

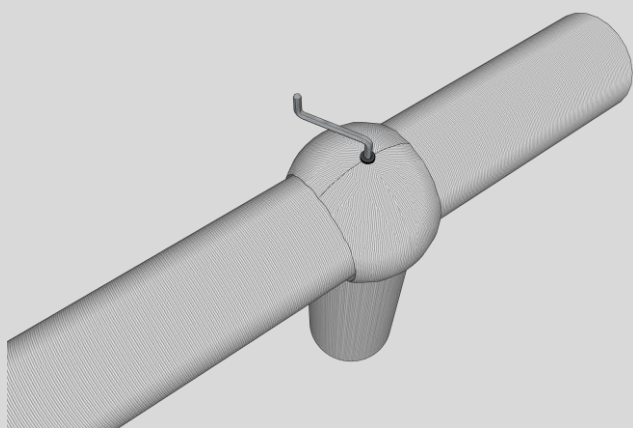

Screw both base plates to the wall.

Step 4

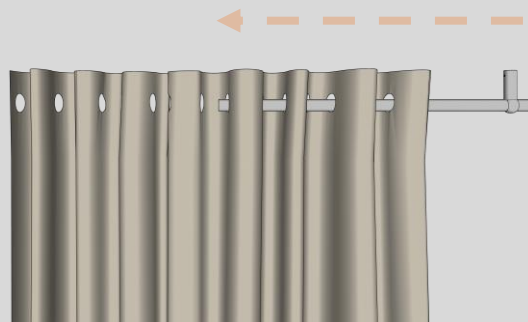

Slide one ceiling bracket onto the rod...

Step 5

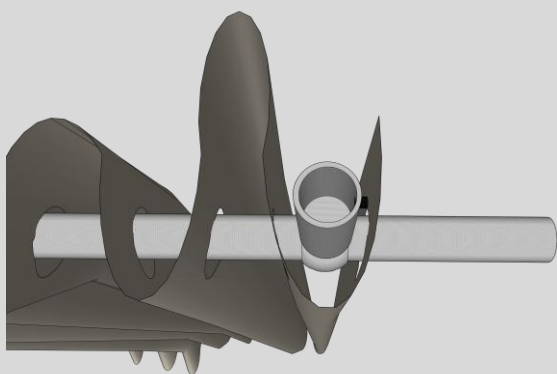

...and fix in the required position on the rod with the 1.5 mm grub screw.

Step 6

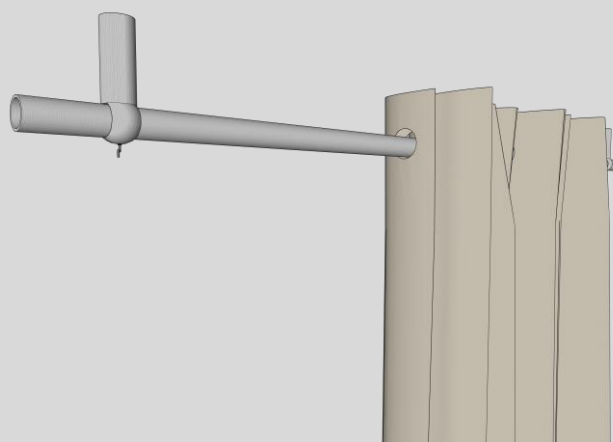

Slide the curtain onto the rod.

Tip:

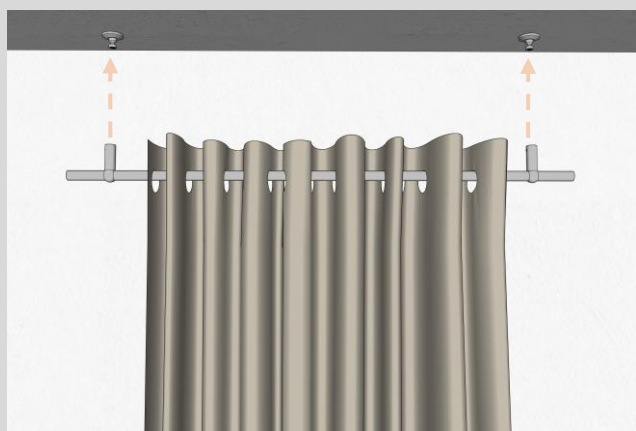

One side of the curtain can be fixed on one side of the rod with a ceiling bracket if required.

Step 7

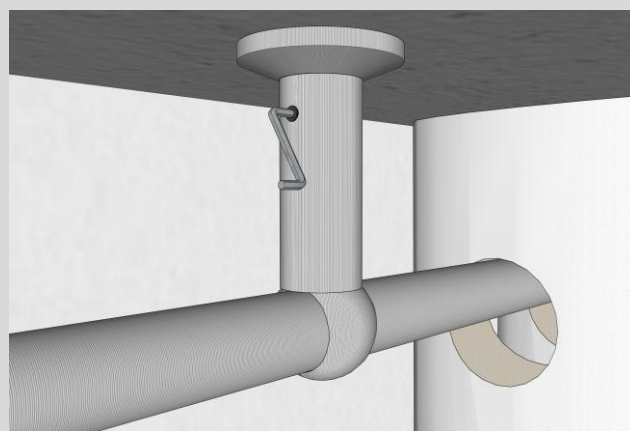

Slide on the second bracket on the rod and screw it tight at the required distance.

Step 8

Place both ceiling brackets below the base plates...

Step 9

and fasten with the grub screws.

Step 10

Slide on an end cap to the left and right of the rod and...

Step 11

...fix it with the grub screw.

Care Instructions:

The HOFA Curtain Rod Set Standard does not require any special maintenance; it should be protected from moisture, though.
